

No incineration within MOU areas.

All incineration is prohibited while traversing the MOU areas. Sewage sludge, rags, paper, packaging, food waste, some plastics, and other trash is incinerated onboard and this is part of the ships' contribution to the air pollution load. We are concerned about dioxin/furans, metals, PAHs, HCl, and other organic chemicals, as well as particulate. In California, they do not allow any incineration within 3 miles of their coast (ATCM, effective November 28, 2007).

Let me know if you need anything else.

Best,  
Heather
